PROFILE

Full-stack web developer based in London with 5+ years of experience building fast, responsive websites and web apps for small businesses. I take projects on my own from the first requirements call to launch (15+ delivered on schedule), connect them to the tools a business already uses, such as GoHighLevel and other CRMs, and keep them quick, searchable and easy to look after. I work in Next.js, React, Node.js and Supabase, and on WordPress, Webflow, Shopify and Framer. I add motion and 3D with GSAP and Three.js where it helps, and use AI tools such as Claude to build and check work faster.

WHAT I CAN BUILD FOR YOU

Business websites

Multi-page sites on Webflow, WordPress, Shopify or Framer, with service pages, FAQs, enquiry forms and online booking.

Web apps

Custom apps in Next.js, React and Node.js with a Supabase (PostgreSQL) back end, sign-in and a REST API.

Integrations

Forms, bookings and WhatsApp enquiries wired into GoHighLevel and other CRMs, so leads and follow-ups run themselves.

Speed and search

Bug fixing, load-time tuning, and the SEO basics: sitemap, robots.txt, clean page structure.

SELECTED PROJECTS

St. Anthony's Service

stanthonysservice.lk

Webflow · GoHighLevel · Custom JavaScript

Multi-page site for a home and business repair company (CCTV, solar, AC, appliances), with service pages, an FAQ, and WhatsApp and online booking enquiries connected to GoHighLevel.

Purehydro

purehydro.lk

Webflow · GoHighLevel · Supabase · Custom JavaScript

Webflow build with enquiries routed into GoHighLevel and Supabase doing the data work behind the forms.

Natyadarshitha

natyadarshitha.com

WordPress

Site about Bharatanatyam, the classical Indian dance form, with sections on theory and practice, a blog, learning resources and a photo gallery.

Fletching Logistics

fletching.co

Webflow · GoHighLevel · Supabase · Make

Site for a Colombo freight forwarder and customs broker, with a page for each service, a shipment tracking form, quote enquiries and a careers page. Leads are routed through GoHighLevel, Supabase and Make.

Imedra Healthcare

imedra.lk

WordPress · WooCommerce · Custom JavaScript

Online store for a Colombo healthcare importer and the local agent for NOW Foods, with product categories, a cart and wishlist, a partners page and custom JavaScript.

WillPower Alliance

willpoweralliance.co.uk

Framer · Custom React components

Responsive event site for a BBC Broadcasting House event on Power of Attorney abuse, with a live countdown, a full-day agenda, speaker and breakout pages, and a free ticket booking form.

EXPERIENCE

Freelance Full-Stack Web Developer · Tetrad Global, Remote

MAR 2024 – MAY 2026

- Built and launched 6 client websites and web applications with Next.js, React and Node.js, from requirements gathering to launch.
- Developed and maintained REST APIs and back-end services on Node.js and Supabase (PostgreSQL) for data storage and authentication.
- Integrated third-party APIs and GoHighLevel CRM workflows to automate lead capture, bookings and follow-ups.
- Customised WordPress themes and built Shopify, Webflow and Framer sites, delivering 15+ projects on schedule.
- Diagnosed and fixed front-end and functionality bugs, reducing reported issues and improving load time by 35%.
- Managed several projects at once and dealt directly with clients on scope and deadlines.

Web Developer · Squarcle, Sri Lanka

JAN 2021 – DEC 2023

- Developed and maintained client websites, building responsive pages in Next.js and JavaScript with interactive components.
- Customised WordPress and PHP themes and added new functionality to client specifications.
- Debugged and resolved production issues and improved site structure and performance by 20%.
- Delivered development tasks independently and met project deadlines.

IT Technician · Self-employed, Sri Lanka

JAN 2020 – OCT 2023

- Diagnosed and repaired hardware and software faults, and installed and configured operating systems and software for customers.
